Education

September 2016 – July 2020 **Harbin Institute of Technology, Weihai**.
B.Eng. (Excepted) in Software Engineering

GPA: 91.73/100, 3.84/4.00. **Rank:** 2/163. **TOEFL iBT:** 100.

Course Highlight: Design & Analysis of Algorithms (95), Compilers: Principles (95), Data Structures (96), Object-oriented Modeling (95), Computer Network (96), Probability and Mathematical Statistics (94)

Professional Experience

Proficient in Python and C++. Capable of Java, C#, LaTeX, JavaScript, HTML/CSS.

September 2017 till now **Intelligent Multimedia Lab**.
Student Researcher, advised by Prof.Weigang Zhang

- Explored several topics in Computer Vision and Reinforcement Learning, including Rebuliding Depth Information in Images, Video Advertising, Multi-Armed Bandit and Deep Q-Net.
- Based on Digital Image Processing and Decision Tree, proposed a simple yet fairly efficient specific object verification algorithm, which runs well on various mobile phones.
- Proposed a novel Multi-Agent Reinforcement Learning Framework for Rebalancing Bike-Sharing System in New York.
- Learned some courses like CS229, CS231n, CS224w, Deep Learning in Cousera and opened source some of my solutions to assignments in Github.

June 2019 till now **Microsoft Research, Asia**, *Knowledge Computing Group*.
Research Intern, advised by Dr.Börje Karlsson, also learned a lot from Dr.Jin-Ge Yao, Guoxin Wang and Dr.Chin-Yew Lin.

- Engaged in NLP research which mainly focused on Named Entity Recognition (NER).
- Participated in a Dialog Bot project, where NER technique is used to extracting key information.
- Wrote a literature review blog which gained more than *100,000* reading.

June 2018 – May 2019 **Specific Events Detection in Live Videos**, *Collegiate Research Practice,Chinese Academic of Sciences.*
Student Researcher, advised by Prof.Qinming Huang and Prof.Weigang Zhang

- Designed an online key frame extraction algorithm, which is sensitive for changing.
- Proposed a CNN model for classifying USFW images based on transefer learning with classmate.

June 2018 **C2C Short Term Rental System**, *Software Engineering Project.*
Software Architect and Technical Director

- As a main technical leader of the team to address various issues in Agile Development Style.
- Designed a software architecture to cover more than 100 use cases with 50 classes.
- Utilized SpringMVC+MyBatis+Vue framework to perform full stack development.

May 2018 **O2O Coupon Usage Prediction Competition**, *Tianchi, Alibaba.*
Individual Project

- Proposed a solution based on feature engineering and logistic regression and ranked *top 1.5%* among over 13000 people.
- Corresponding paper won the First Prize at HIT Collegian Academic Forum.

Selected Honors and Awards

During undergraduate studies of past 3 to 4 years, I won more than *20* awards in total.

April 2019 **Zuguang Ma Scholarship as well as Top Ten College Students**.
Top 10 of 10000+ students (<0.1%).
Highest hornor & scholarship in HITwh for academic achievements, social activities, and charity work.

November 2019, November 2018 **National Scholarship**, *issued by Ministry of Education.*
Top 3 of 180 students.
Won twice in total. One of the highest hornors for students in China.

December 2018 **Bronze Medal**, *The 2018 ACM-ICPC Asia-East Continent Final.*

May 2019 **Gold Medal**, *The 10-th Shandong Province Collegiate Programming Contest.*

April 2019 **Second Prize**, *The 2019 National English Competition for College Students.*

March 2019 **TOP 100 in the Country**, 16th CCF Certified Software Professional (CSP), issued by China Computer Federation (CCF).
Top 0.86% of 11224 participants.

July 2018 **First Prize**, *The 2018 HIT Collegian Academic Forum.*

November 2017 **Oustanding Student Leader of HIT**, *issued by Harbin Institute of Technology.*

November 2017 **First Grade Scholarship**, *issued by Harbin Institute of Technology, Weihai.*

May 2017 **Social Practice Scholarship**, *issued by Harbin Institute of Technology, Weihai.*

Extracurricular Activities

September 2016 till now **Public Student Service**.
I love participating in social activities, where I offer my help to others and learn to build up my leardership and teamwork ability. Till now, I've been involved in around *8* student services, where up to *1,000+* students got benefits from my countless volunteer hours.

- Class Monitor: Organized several class activities and handled class general affairs.
- Member of Student Union and Department Center for Scholarly Exchange: Participated in editing propaganda material like posters and PPTs, activities organization like New Year Party, Graduation Party and Studying Abroad Seminar and fresh member interviews.
- Member of Oustanding Student Group: Shared experiences and gave talks to junior students.

September 2017 – June 2019 **Member of Student ACM-ICPC Team**.

- Participated in problem-setting in school competitive programming training and competition.
- Served as a teaching assistant for course - Advanced Programming for Problem Solving in Spring 2018 and Spring 2019.

Whole Life **Knowledge Sharing**.
As a dedicated technical writer and sharer, I enjoy sharing my knowledge to the community in various platforms. Till now, my creatures have been read more than *120,000* times.

- Competitive Programming Solutions and Tutorials: CSDN Blog and BiliBili.
- Artifical Intelligence Tutorials and Blogs: Zhihu, MSRA-Wechat and Github.

Miscellaneous

Selected Media Coverage.

- MSRA News: Recent Highlights of BERTs.
- HITwh News: Top Ten Students Highlights: CHEN, YONGQIANG.

Interests & Skills

Photography, Chinese Classical Poetry, Guitar.

I love challenges. In one of the most challenging games - StarCraft II, I once ranked *top 10%* around the world.
