Education

September 2016 – July 2020 **Harbin Institute of Technology, Weihai**.
B.Eng. (Excepted) in Software Engineering

GPA: 91.73/100, 3.84/4.00. **Rank:** 2/163. **TOEFL iBT:** 100.

Course Highlight: Design & Analysis of Algorithms (95), Compilers: Principles (95), Data Structures (96), Object-oriented Modeling (95), Computer Network (96), Probability and Mathematical Statistics (94)

Professional Experience

Proficient in Python and C++. Capable of Java, C#, LaTeX, JavaScript, HTML/CSS.

September 2017 till now **Intelligent Multimedia Lab**.
Student Researcher, advised by Prof. Weigang Zhang

- Explored several topics in Computer Vision and Reinforcement Learning, including Rebuliding Depth Information in Images, Video Advertising, Multi-Armed Bandit and Deep Q-Net.
- Based on Digital Image Processing and Decision Tree, proposed a simple yet fairly efficient specific object verification algorithm, which runs well on various mobile phones.
- Proposed a novel Multi-Agent Reinforcement Learning Framework for Rebalancing Bike-Sharing System in New York.
- Learned some courses like CS229, CS231n, CS224w, Deep Learning in Cousera and opened source some of my solutions to assignments in Github, which got stars from students in Tsinghua University, Zhejiang University and so on.

June 2019 till now **Microsoft Research, Asia**, *Knowledge Computing Group*.
Research Intern, advised by Dr. Börje Karlsson, also learned a lot from Dr. Jin-Ge Yao, Guoxin Wang and Dr. Chin-Yew Lin.

- Engaged in NLP research which mainly focused on Named Entity Recognition (NER).
- Participated in a Dialog Bot project, where NER technique is used to extracting key information.
- Wrote a literature review blog which gained more than *100,000* reading.

June 2018 – May 2019 **Specific Events Detection in Live Videos**, *Collegiate Research Practice, Chinese Academic of Sciences*.
Student Researcher, advised by Prof. Qinming Huang and Prof. Weigang Zhang

- Designed an online key frame extraction algorithm, which is sensitive for changing.
- Proposed a CNN model for classifying USFW images based on transefer learning with classmate.

June 2018 **C2C Short Term Rental System**, *Software Engineering Project*.
Software Architect and Technical Director

- As a main technical leader of the team to address various issues in Agile Development Style.
- Designed a software architecture to cover more than 100 use cases with 50 classes.
- Utilized SpringMVC+MyBatis+Vue framework to perform full stack development.

May 2018 **O2O Coupon Usage Prediction Competition**, *Tianchi, Alibaba*.
Individual Project

- Proposed a solution based on feature engineering and logistic regression and ranked *top 1.5%* among over 13000 people.
- Corresponding paper won the First Prize at HIT Collegian Academic Forum.

Selected Honors and Awards

During undergraduate studies of past 3 to 4 years, I won more than *20* awards in total.

April 2019 **Zuguang Ma Scholarship as well as Top Ten College Students**.
Top 10 of 10000+ students (<0.01%).
Highest hornor & scholarship in HITwh for academic achievements, social activities, and charity work.

November 2019, November 2018 **National Scholarship**, *issued by Ministry of Education.*
Top 3 of 180 students.
Won twice in total. One of the highest hornors for students in China.

December 2018 **Bronze Medal**, *The 2018 ACM-ICPC Asia-East Continent Final.*

May 2019 **Gold Medal**, *The 10-th Shandong Province Collegiate Programming Contest.*

April 2019 **Second Prize**, *The 2019 National English Competition for College Students.*

March 2019 **TOP 100 in the Country**, 16th CCF Certified Software Professional (CSP), issued by China Computer Federation (CCF).
Top 0.86% of 11224 participants.

July 2018 **First Prize**, *The 2018 HIT Collegian Academic Forum.*

November 2017 **Oustanding Student Leader of HIT**, *issued by Harbin Institute of Technology.*

November 2017 **First Grade Scholarship**, *issued by Harbin Institute of Technology, Weihai.*

May 2017 **Social Practice Scholarship**, *issued by Harbin Institute of Technology, Weihai.*

Extracurricular Activities

September 2016 till now **Public Student Service**.
I love participating in social activities, where I offer my help to others and learn to build up my leardership and teamwork ability. Till now, I've been involved in around *8* student services, where up to *1,000+* students got benefits from my countless volunteer hours.

- Class Monitor: Organized several class activities and handled class general affairs.
- Member of Student Union and Department Center for Scholarly Exchange: Participated in editing propaganda material like posters and PPTs, activities organization like New Year Party, Graduation Party and Studying Abroad Seminar and fresh member interviews.
- Member of Oustanding Student Group: Shared experiences and gave talks to junior students.

September 2017 – June 2019 **Member of Student ACM-ICPC Team**.

- Participated in problem-setting in school competitive programming training and competition.
- Served as a teaching assistant for course - Advanced Programming for Problem Solving in Spring 2018 and Spring 2019.

Whole Life **Knowledge Sharing**.
As a dedicated technical writer and sharer, I enjoy sharing my knowledge to the community in various platforms. Till now, my creatures have been read more than *120,000* times.

- Competitive Programming Solutions and Tutorials: CSDN Blog and BiliBili.
- Artifical Intelligence Tutorials and Blogs: Zhihu, MSRA-Wechat and Github.

Miscellaneous

Selected Media Coverage.

- MSRA News: Recent Highlights of BERTs.
- HITwh News: Top Ten Students Highlights: CHEN, YONGQIANG.

Interests & Skills

Photography, Chinese Classical Poetry, Guitar.

I love challenges. In one of the most challenging games - StarCraft II, I once ranked *top 10%* around the world.
