Education

September 2016 – July 2020 **Harbin Institute of Technology, Weihai**.
B.Eng. (Excepted) in Software Engineering

GPA: 91.73/100, 3.84/4.00. **Rank:** 2/163. **TOEFL iBT:** 100.

Course Highlight: Design & Analysis of Algorithms (95), Compilers: Principles (95), Data Structures (96), Object-oriented Modeling (95), Computer Network (96), Probability and Mathematical Statistics (94)

Selected Honors and Awards

During my undergraduate studies in the past three years, I have won more than *20* awards in total.

April 2019 **Zuguang Ma Scholarship as well as Top Ten College Students**.
Top 10 of 10000+ students (<0.1%).
The highest honor & scholarship at HIT Weihai for academic achievements, social activities, and charity work.

March 2019 **TOP 100 in China**, 16th CCF Certified Software Professional (CSP), issued by China Computer Federation (CCF).
Top 0.86% of 11,224 participants.

November 2019 **National Scholarship**, *issued by Ministry of Education.*
Top 3 of 180 students.

November 2018 **National Scholarship**, *issued by Ministry of Education.*
Top 3 of 180 students.

December 2018 **Bronze Medal**, *The 2018 ACM-ICPC Asia-East Continent Final.*

May 2019 **Gold Medal**, *The 10-th Shandong Province Collegiate Programming Contest.*

April 2019 **Second Prize**, *The 2019 National English Competition for College Students.*

July 2018 **First Prize**, *The 2018 HIT Collegian Academic Forum.*

November 2017 **Oustanding Student Leader of HIT**, *issued by Harbin Institute of Technology.*

November 2017 **First Grade Scholarship**, *issued by Harbin Institute of Technology, Weihai.*

May 2017 **Social Practice Scholarship**, *issued by Harbin Institute of Technology, Weihai.*

Working Research Manuscripts

VERT: A Versatile Entity Recognition and Disambiguation Toolkit
Knowledge Computing Group, MSRA, *including* ***Yongqiang Chen***.

Graph Neural Networks and Named Entity Recognition for Event Analysis
Yongqiang Chen, Jin-Ge Yao, Weigang Zhang and Börje Karlsson.

Neural Embedding for Efficient Edit Distance Similarity Search

Xinyan Dai, Xiao Yan, ***Yongqiang Chen*** and Han Yang.

Using Vector Quantization for Neural Network Compression and Acceleration

Xinyan Dai, ***Yongqiang Chen*** and Weirong Cheng.

A Multi-Agent Reinforcement Learning Framework for Rebalancing Bike-Sharing System in New York

Yongqiang Chen, Jinchang Chen and Weigang Zhang.

Professional Experiences

Proficient in Python, C/C++, Java, C#, LaTeX, JavaScript, HTML/CSS.

June 2019 till now **Microsoft Research, Asia**, *Knowledge Computing Group.*

Research Intern, advised by Dr.Börje Karlsson, also working with Dr.Jin-Ge Yao, Guoxin Wang and Dr.Chin-Yew Lin.

- Engaged in NLP research which mainly focuses on Named Entity Recognition (NER).
- Participated in a Dialog Bot project, where NER technique is used to extract key information.
- Wrote a literature review blog, which has gained more than *100,000* reading.

September 2017 till now **Intelligent Multimedia Lab**.

Student Researcher, advised by Prof. Weigang Zhang

- Explored several topics in Computer Vision and Reinforcement Learning, including Rebuliding Depth Information in Images, Video Advertising, Multi-Armed Bandit and Deep Q-Net.
- Based on Digital Image Processing and Decision Tree, proposed a simple yet fairly efficient specific object verification algorithm, which runs well on various mobile phones.
- Proposed a novel Multi-Agent Reinforcement Learning Framework for Rebalancing Bike-Sharing System in New York.

June 2018 – May 2019 **Specific Event Detection in Live Videos**, *Collegiate Research Practice, Institute of Computing Technology, Chinese Academic of Sciences.*

Student Researcher, advised by Prof.Qinming Huang and Prof.Weigang Zhang

- Designed an online key frame extraction algorithm, which is sensitive for changing.
- Proposed a CNN model for classifying USFW images based on transefer learning.

June 2018 **C2C Short Term Rental System**, *Software Engineering Project.*

Software Architect and Technical Director

- As the technical leader of the team, addressed various issues in Agile Development Style.
- Designed a software architecture to cover more than 100 use cases with 50 classes.
- Utilized the SpringMVC+MyBatis+Vue framework to perform full stack development.

May 2018 **O2O Coupon Usage Prediction Competition**, *Tianchi, Alibaba.*

Individual Project

- Proposed a solution based on feature engineering and logistic regression and ranked *top 1.5%* among over 13,000 people.
- The corresponding paper won the First Prize at HIT Collegian Academic Forum.

Extracurricular Activities

September 2016 till now **Public Student Services**.

I love participating in social activities, where I offer my help to others and learn to build up my leardership and teamwork ability. Up till now, I have been involved in around *8* student services, having served *1,000+* students.

- Member of Student Union and Department Center for Scholarly Exchanges: Participated in editing propaganda materials such as posters and presentation slides, and activity organizations such as New Year Parties, Graduation Parties and Studying Abroad Seminars and fresh member interviews.
- Member of Outstanding Student Group: Shared experiences and gave talks to junior students.
- Class Monitor: Organized several class activities and handled class general affairs.

September 2017 – June 2019 **Member of ACM-ICPC Team**.

- Participated in problem-setting in school competitive programming training and competitions.
- Served as a teaching assistant for courses - Advanced Programming for Problem Solving in Spring 2018 and Spring 2019.

Whole Life **Knowledge Sharing**.

As a dedicated technical writer and sharer, I enjoy sharing my knowledge to the community in various platforms. Till now, my writings have been read more than *120,000* times.

- Competitive Programming Solutions and Tutorials: CSDN Blog and BiliBili.
- Artificial Intelligence Tutorials and Blogs: Zhihu, MSRA-Wechat and Github.

Miscellaneous

Selected Media Coverage.

- MSRA News: Recent Highlights of BERTs.
- HITwh News: Top Ten Students Highlights: CHEN, YONGQIANG.

Interests & Skills

Photography, Chinese Classical Poetry, Guitar.

I love challenges. In one of the most challenging games - StarCraft II, I once ranked *top 10%* around the world.
